TRENDS

1. SCIENCE WILL OPEN UP

- Data-driven
- Reproducibility
- Better connect within science and with society

2. INFORMATION SOCIETY

3. PLATFORMS

1. SCIENCE WILL OPEN UP

2. INFORMATION SOCIETY

- Data is the new oil
- Re-usable

3. PLATFORMS

1. SCIENCE WILL OPEN UP

2. INFORMATION SOCIETY

3. PLATFORMS

- Value-creating interactions producers & users

The infographic is divided into three columns and two main sections. The top section, on a teal background, lists three benefits of open science: 'GOOD FOR SCIENCE' (allows scientists to build on previous research results and avoids unnecessary duplication of effort, improved quality and greater efficiency), 'GOOD FOR THE ECONOMY' (speeds up innovation, faster progress to market), and 'GOOD FOR SOCIETY' (makes research available to individual citizens and to non-profit organisations, greater transparency). The middle section shows a cityscape where buildings are replaced by logos of major tech companies: Amazon, Uber, Microsoft, Google, Facebook, and Tesla. The bottom section features a white background with the logos of Google, Amazon.com, Apple, and Facebook.

GOOD FOR SCIENCE
allows scientists to build on previous research results and avoids unnecessary duplication of effort
improved quality and greater efficiency

GOOD FOR THE ECONOMY
speeds up innovation
faster progress to market

GOOD FOR SOCIETY
makes research available to individual citizens and to non-profit organisations
greater transparency

Open Science

"Open science is the idea that scientific knowledge of all kinds should **be openly shared** as early as is practical in the discovery process."

Michael Nielsen

Why Open Science?

Europe must embrace the transformative power of open science

allowing for a **faster circulation of increasing amounts of knowledge,** and **seize the potential of open innovation** to trigger faster and fairer growth, building a knowledge economy that is open to the world. (p. 8)

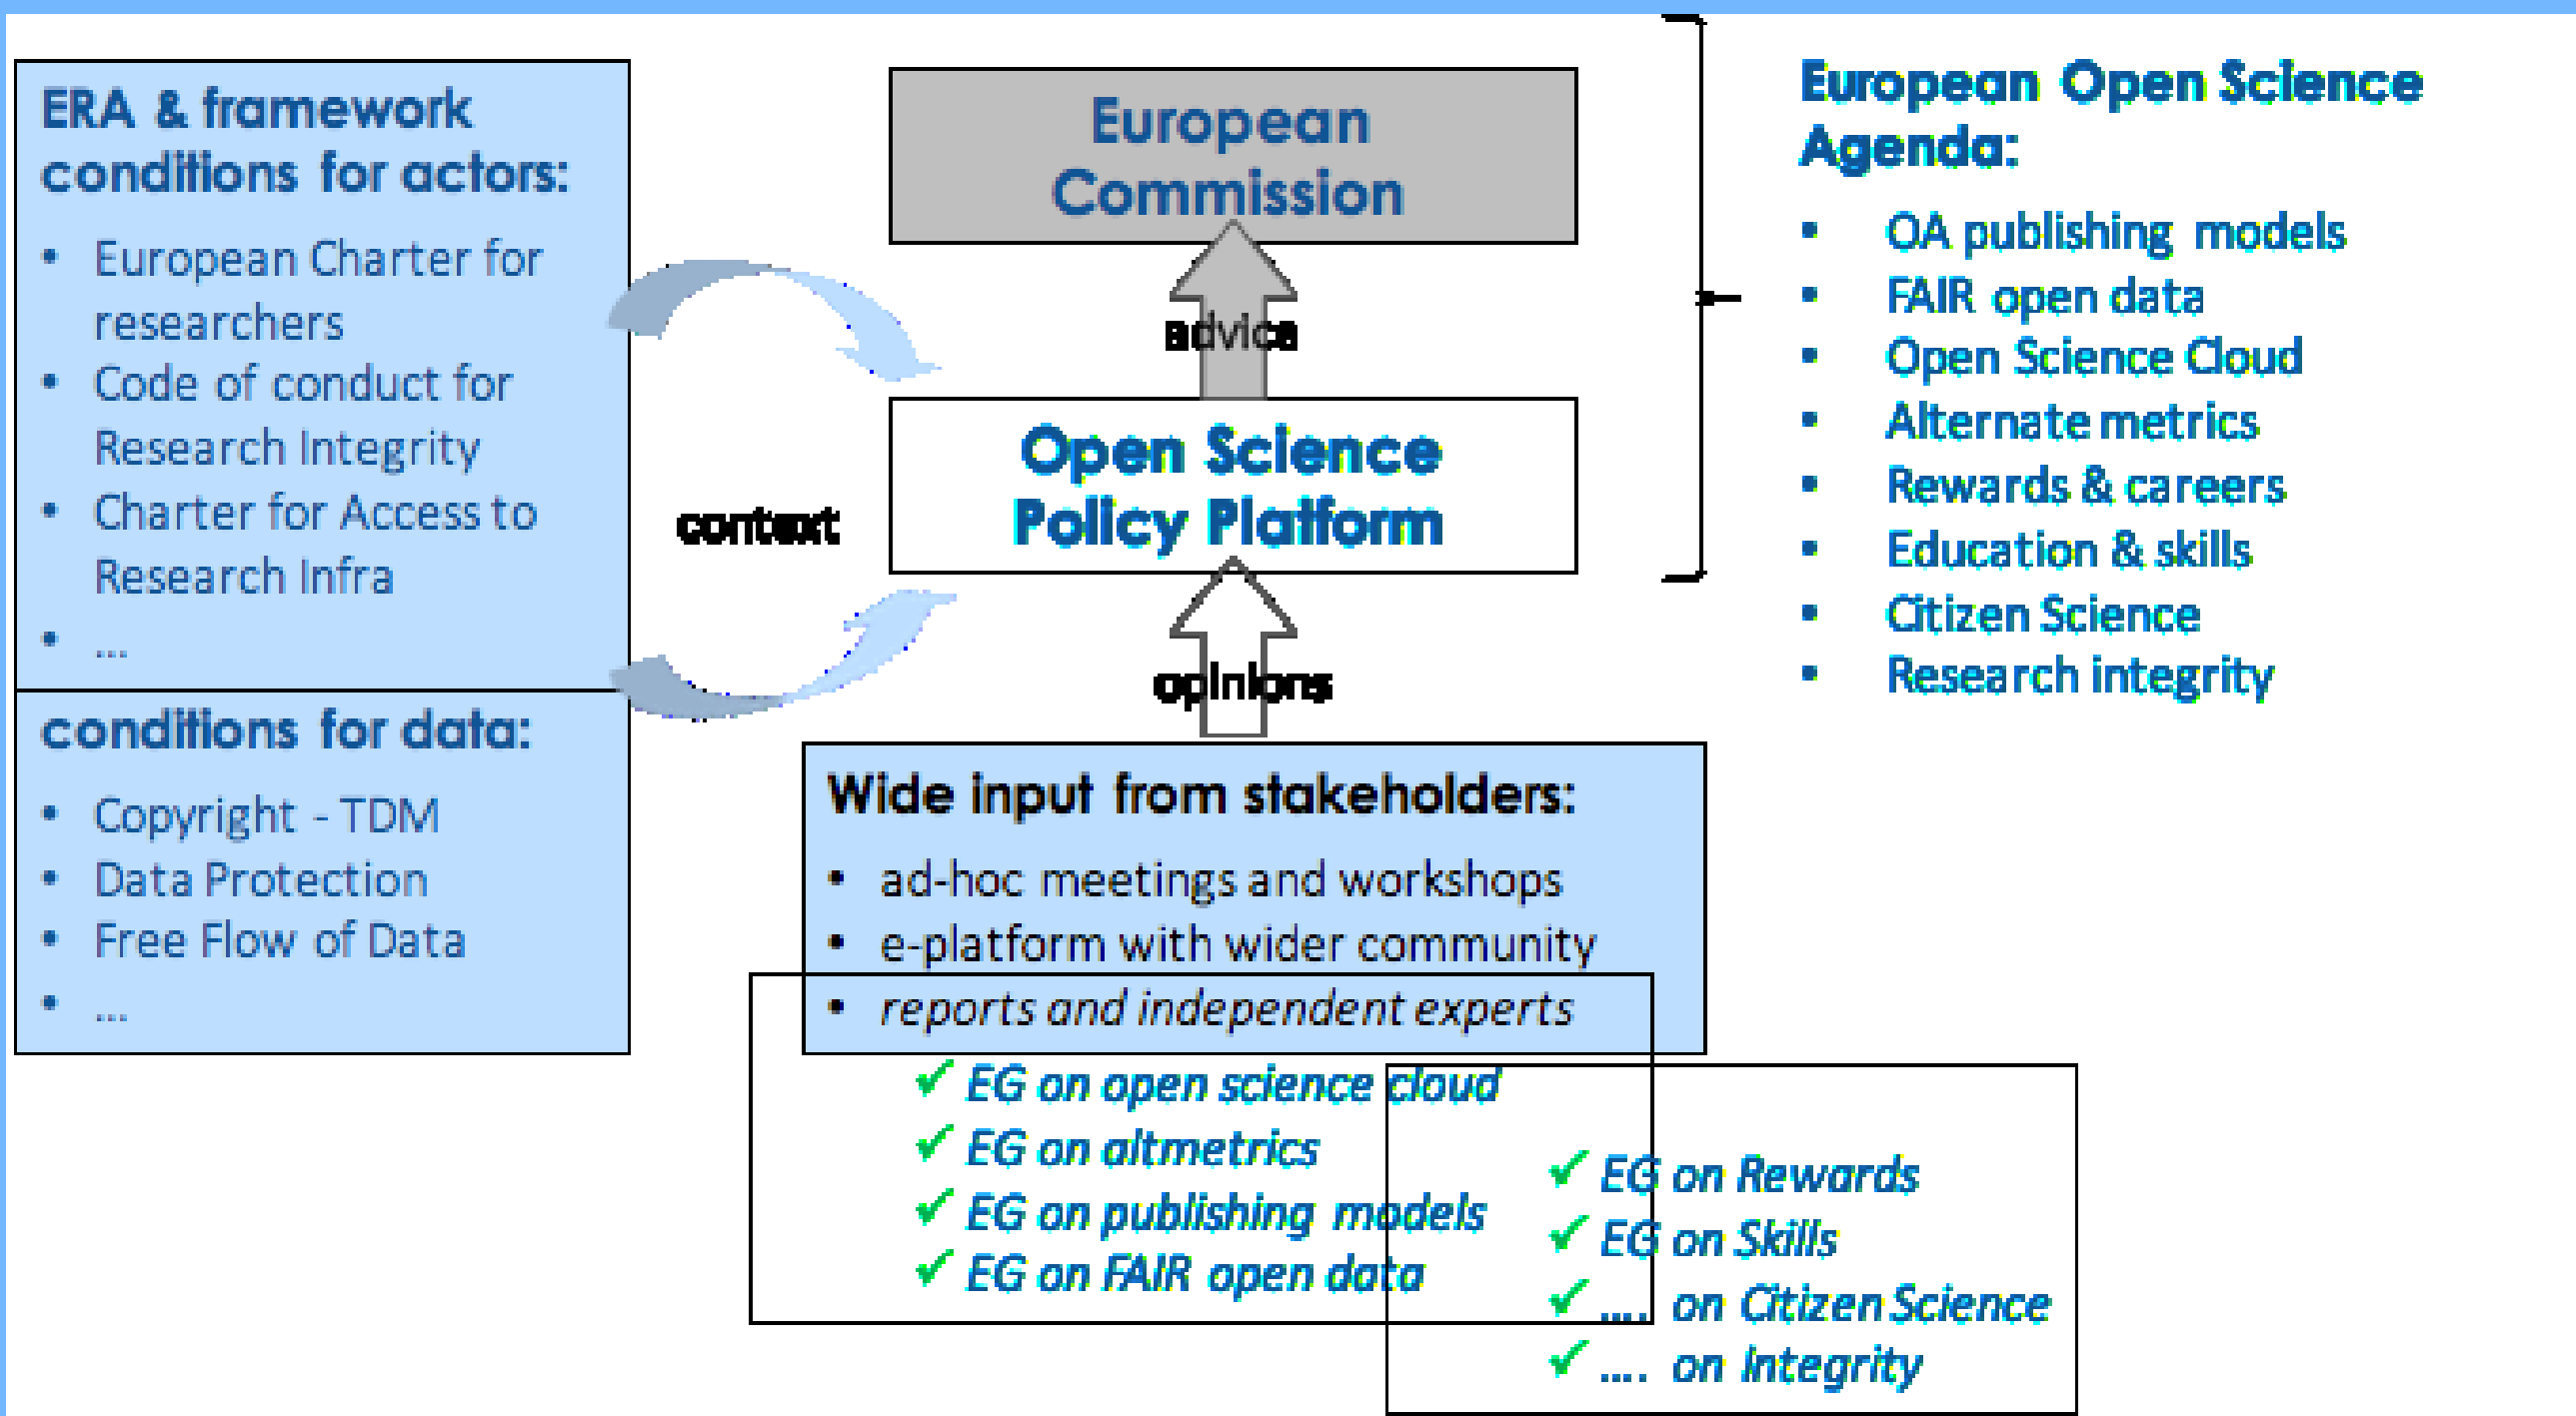

European Open Science Agenda

1. Reward systems
2. Altmetrics
3. New models for publishing
4. FAIR open data
5. Open Science Cloud
6. Research integrity
7. Citizen Science
8. Open education and skills

European Open Science Agenda

- | | |
|------------------------------|-------------------|
| 1. Reward systems | July 2017 |
| 2. Altmetrics | December 2016 |
| 3. New models for publishing | Starting up |
| 4. FAIR open data | Working |
| 5. Open Science Cloud | Oct. 16 & Working |
| 6. Research integrity | WP SwafS 2018-20 |
| 7. Citizen Science | WP SwafS 2018-20 |
| 8. Open education and skills | July 2017 |

Open Science Policy Platform

European Open Science Cloud

Virtual environment for **all European researchers** to store, manage, analyse and re-use data

Federation of existing and emerging data infrastructures

European Open Science Cloud

European Open Science Cloud is part of Europe's ambition to support the transition to Open Science and make the most of data-driven science.

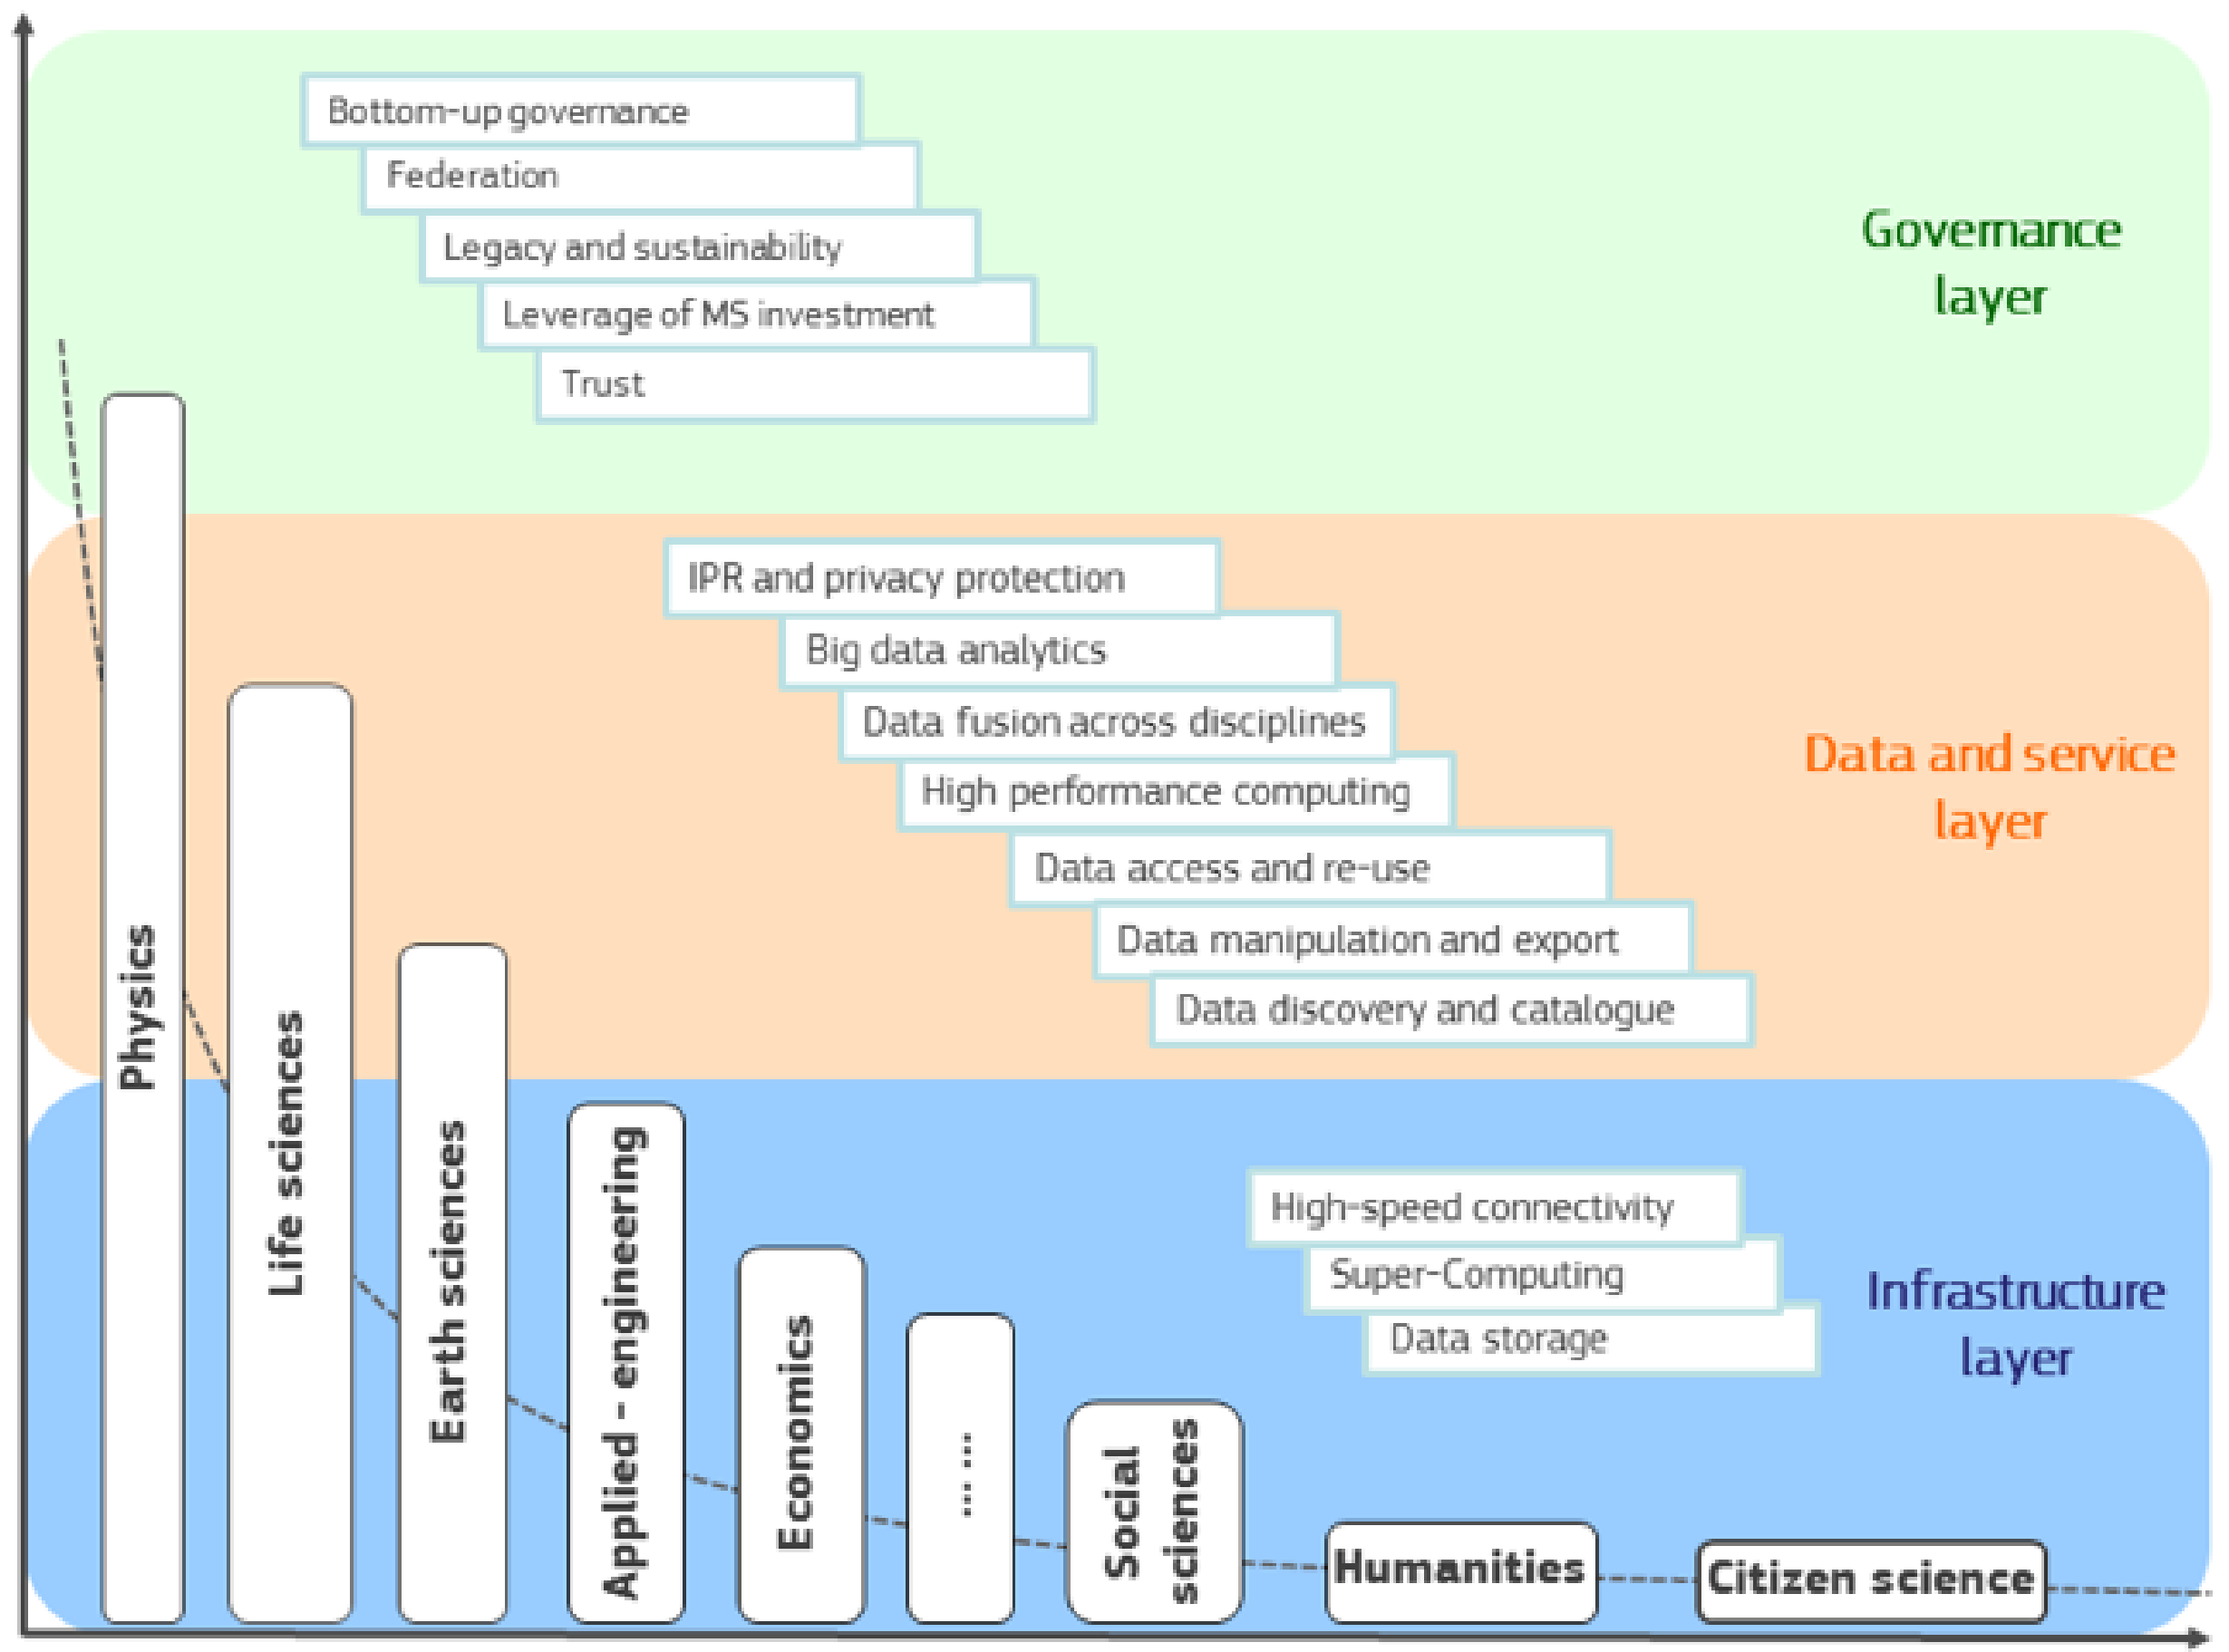

Strongly stated need:

it's cost-effective, and privacy & IPR-conscious

Added value:

scale, data-driven science, inter-disciplinary,
data - to - knowledge - to - innovation

Scale of scientific activity (data-driven science)

Lead scientific users...

...long tail of science

It's a cultural challenge

Parameters / How to ...

- Create a safe & secure environment
- Realise authentication - of users, of producers
- Ensure quality of the data
- Deal with sensitive data
- **Bring trust**

It's a cultural challenge

Parameters / How to ...

- Create a safe & secure environment
- Realise authentication - users, of producers
- Ensure quality of the data
- Deal with sensitive data
- **Bring trust**

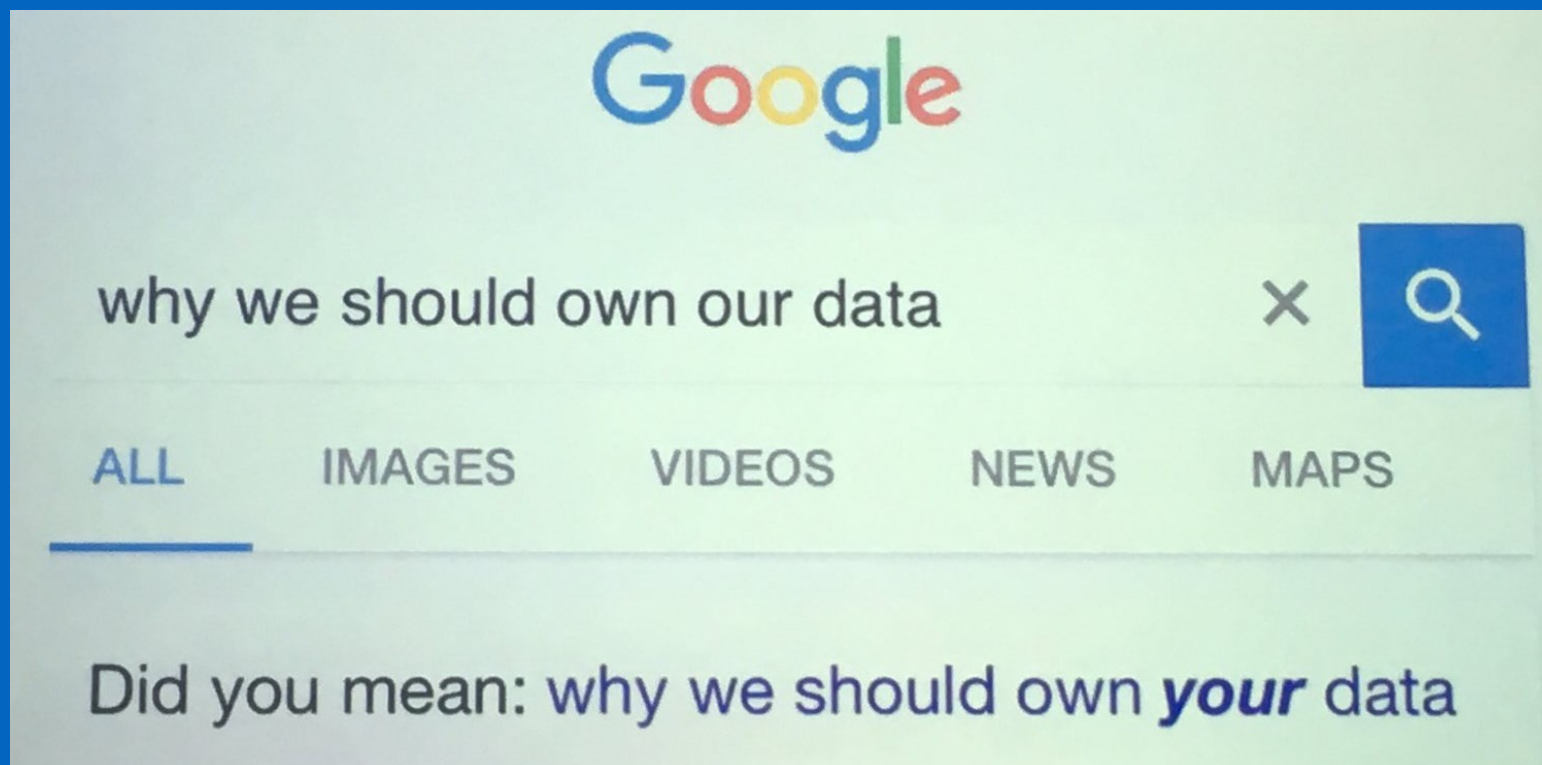

WHERE ARE THE INCENTIVES TO SHARE DATA

Information Society

Importance of Data

- Data become infrastructure themselves
- Big Data
- Merging Big Data and AI is the next step
 - Machines will take better decisions, perform better, and faster than humans

Why CESSDA?

Member Countries are convinced that the provision of access to social science data and metadata is vital to our understanding of society

- Its major challenges
- Ongoing societal processes
- Problems involved and the solutions available

Members seek

- **To increase the scientific excellence and efficacy of European research in the social sciences, as well as**
- **To expand easy access to data and metadata regardless of any borders**

CESSDA Mission and

Vision

MISSION: The task of CESSDA ERIC is

to provide a distributed and sustainable research infrastructure

enabling the research community to conduct high-quality research in the social sciences

contributing to the production of effective solutions to the major challenges facing society today

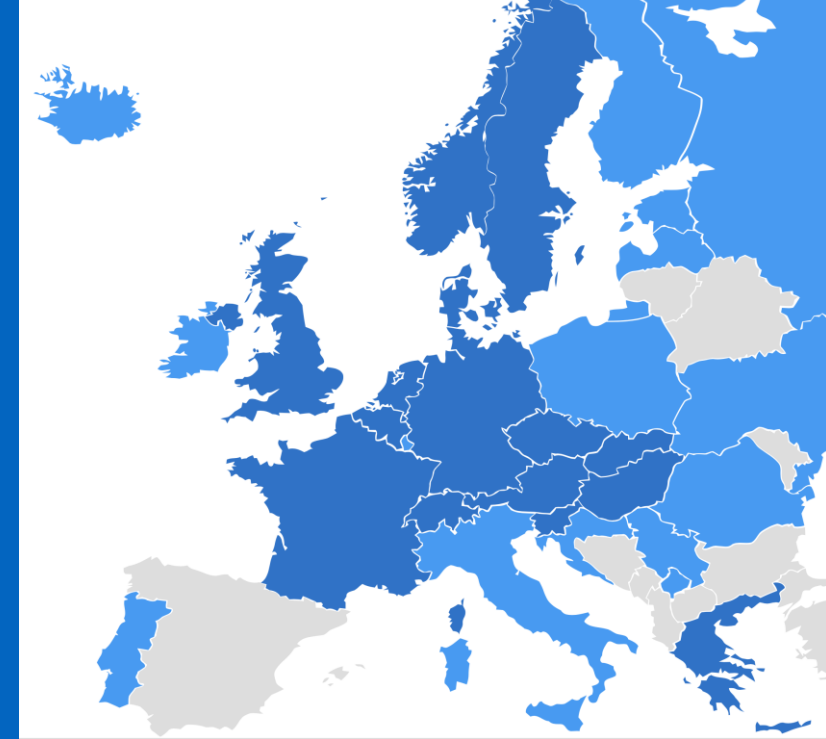

and to facilitate teaching and learning in the social sciences

VISION: CESSDA wants to be a key player in the social sciences domain, striving for full European coverage, providing

- **a trusted platform for researchers** with tools and services to curate, publish and re-use research data

- **training** to the research community throughout the whole research cycle

Why a consortium?

- **Critical mass**

- In Brussels - eligible for funding, trusted repositories

- Standards - metadata, persistent identifiers

- Partnerships - other ESFRI's/ERICs, National Statistics, ...

- Replace Fragmentation by Coordination

- **Sharing expertise**

- Safe and Secure Data Infrastructure

- Joint Research & Innovation

- Data Clusters

- **For Researchers**

- Deposit , Find, and Re-use

- Tools for constructing data, provide seamless access and use

- Training

Why a consortium?

- **Critical mass**

- In Brussels - eligible for funding
 - Standards - metadata, peer review
 - Partnerships - other European consortia, ...
 - Replace Fragmented efforts

- **For Research**

- Deposit
 - Tools
 - Training
 - Interoperable use (e.g. DMP, Single Sign On)

- **Sharing**

- Safe and secure infrastructure
 - Joint Research and Innovation
 - Data Clusters

**ADVANCES THE INTERDEPENDENCE
BETWEEN ITS MEMBERS
WHILE RECOGNISING THE INDEPENDENCE
OF ITS MEMBERS**

CESSDA as part of EOSC

- Data Deposit and Reuse
 - FAIR
 - CESSDA Catalogue (Findable)
 - Safe & Secure Data Infrastructure (Accessible)
 - **CESSDA Providers as Trusted Repositories**
 - Pilots on Interoperability
- Training & Tools/Services
 - Train the Trainers & Train the Researchers
 - Data Management Tools, Vocabularies, Easy-deposit

Get your data organised

Why ?

- Science and Society ask for these data
 - Importance of research data, good descriptions, easy access
- More efficient use of public finances
 - Long-term access
 - Re-use of FAIR data

How?

- Focus on the data-user
 - Problem-oriented
 - Have the users involved - right from the beginning!
- Have a national backbone — AUSSDA!
 - Longterm archiving and access, expertise, training, etc.
 - Ensures Sustainability and brings Trust in the ecosystem

Personal Note

IF YOU WANT TO GO FAST,
GO ALONE.

IF YOU WANT TO GO FAR,
GO TOGETHER

Thank you
